

## Subject: PE

### Our learning values

Working Together	Curiosity	Making Connections	The Bigger Picture	Keeping Going
I like to work together with other people in school as well as the local community. This allows me to share my ideas and helps me to learn.	I just love asking questions to find out about things. I like to investigate, create and explore to find the answers.	I enjoy making connections with my learning. I like to see how everything fits together. I love linking learning from different areas together, it helps me to understand what I am doing.	I see the bigger picture. I plan ahead so I am clear about what I need to learn. I look back at what I've done so I know what to do next. It is important to me that I do my very best.	I keep on going. It doesn't matter how hard I find something. When things get tough I use my perseverance to stick at a task and try my best. By doing this I discover that learning becomes easier than I thought.

PE's Aims:

At Shute we aim to ensure that all pupils:

- develop competence to succeed in a broad range of physical activities
- are physically active for sustained periods of time
- engage in competitive sports and activities
- lead healthy, active lives

At Shute Primary, we aim to provide a PE curriculum that children from Reception to Year 6 not only enjoy but allows them to experience a range of activities that help them to develop their health, fitness and mental wellbeing. We intend to offer a high-quality physical education curriculum that inspires all children to become more confident in team-sports and other physically-demanding activities. Children have opportunities to compete within our school and learning community, embedding core values such as fairness and respect. Through Residential Trips, children get the chance to experience other sports within unfamiliar environments. Our resourceful school grounds allow us to provide a regular forest experience which helps develop children's team skills as well as the opportunity for physical development in an informal environment. Children are taught the importance of a healthy lifestyle. They learn and experience the way we can keep our body and mind healthy by considering a balanced diet as well as keeping active. They recognise the importance of regular physical activity and how it contributes to feelings of happiness.
